McCREARY COUNTY WATER DISTRICT

WATER RATIONING ORDINANCE

ORDINANCE NO.

An ordinance authorizing the declaration of water rationing; establishing procedures and measures for the essential conservation of water resources; authorizing the issuance of administrative regulations; and prescribing certain penalties.

Be It Enacted by the Fiscal Court of McCreary County.

Section 1. Purpose. The purpose of this ordinance is to provide for the declaration of rationing for equitable distribution of critically short water supplies. Nothing in this ordinance shall be construed to interfere with common law riparian or statutory water rights.

JUL 24 1999

Section 2. Definitions

- PURSUANT TO 807 KAR 50.11, SECRETARY OF THE COMMISSION
- (a) "Allotment," as the term is used in this ordinance, shall mean the maximum quantity of water allowed for each customer over any applicable as established in the provisions of this ordinance.
- (b) "Customer," as the term is used in this ordinance, shall mean any person using water for any purpose from the Districts water distribution system and for which either a regular charge is made or, in the case of bulk sales, a cash charge is made at the site of delivery.
- (c) "Excess Use," as the term is used in this ordinance, shall mean the usage of water by a water customer in excess of the water allotment provided under the provisions of this ordinance for that customer, over any applicable period.
- (d) "Non-Residential Customer," as the term is used in this ordinance, shall mean commercial, industrial, institutional, public and all other such users, with the exception of hospitals and health care facilities.
- (e) "Rationing," as the term is used in this ordinance, shall mean procedures established to provide for the equitable distribution of critically-limited water supplies, in order to balance demand and limited available supplies, and to assure that sufficient water is available to preserve public health and safety.
- (f) "Residential Customer," as the term is used in this ordinance, shall mean any customer who receives water service for a single or multi-family dwelling unit. The term residential customer does not include educational or other institutions, hotels, motels, or similar commercial establishments.
- (g) "Service Interruption," as the term is used in this ordinance, shall mean the temporary suspension of water supply, or reduction of pressure below that required for adequate supply, to any customer, portion of a water supply, or entire system.

- (h) "Water Supplies," as the term is used in this ordinance, shall mean water available to McCreary County Water District for treatment by virtue of its water rights or withdrawal permit or any treated water introduced by the District into its water distribution system, including water offered for sale.

Section 3. Declaration of Rationing. Whenever the governing body of the District finds a need to provide for the equitable distribution of critically-limited water supplies, in order to balance demand and limited available supplies, and to assure that sufficient water is available to preserve public health and safety, it shall be empowered to declare by resolution the adoption of mandatory rationing.

Section 4. Objectives of Rationing

- (a) It is imperative that water customers achieve an immediate further reduction in water use in order to extend existing water supplies and, at the same time, assure that sufficient water is available to preserve the public health and sanitation and to provide fire protection service.
- (b) Should shortages continue, further reductions in usage may be required. The additional usage reduction in the rationed area must be a valid and attainable goal reflective of the conditions which currently exist.
- (c) The plan provides for equitable reductions in water usage and for equal sacrifice on the part of each water customer. The success of this ordinance depends on the cooperation of all water customers in the emergency area.

Section 5. Water Use Rationing for Residential Customers.

- (a) Metered Residential Water Customers and Allotments:
- (1) The number of permanent residents in each dwelling unit (household) will determine the amount of water that each household will be allowed.
 - (2) Each dwelling unit (household) shall be allotted 40 gallons per day for each resident of the household. Households with only one permanent resident will have a daily allotment of 55 gallons.
 - (3) Residential water customers are required to provide County and utility personnel with reasonable access to read meters as necessary to this rationing declaration. Where access is not readily available, all reasonable efforts to contact customers in order to arrange for access to read meters shall be made. In the event a water customer does not allow entry to read the meter after reasonable efforts to arrange for such access, the dwelling unit (household) allotment will be reduced to 55 gallons per day; 40 gallons for households with only one permanent resident.

- (4) (1) Where the residential water allotment provided under this section would create an extraordinary hardship, as in the case of special health-related requirements, the water customer may apply to the County for an exemption or variance from these requirements. If it is found that the allotment provided in this section would impose an extraordinary hardship, a revised allotment for the particular customer may be established.

- (11) Any person aggrieved by a decision relating to such an exemption or variance rendered by a public utility rendering water service beyond its corporate limits, may file a complaint with the Public Service Commission.

Section 6. Water Use Rationing for Non-Residential Water Customers

PUBLIC SERVICE COMMISSION
OF KENTUCKY
EFFECTIVE

- (a) Non-residential water customers shall further reduce their water usage to 50 percent of use levels during rationing.
- (b) It is the primary responsibility of each non-residential water customer to meet its mandated water use reduction in what ever manner possible.
- (c) The District will establish a water allotment for each non-residential water customer, based upon a required further reduction of water usage from the rate of water used by the customer in effect on _____, or the last recorded use level if no meter readings record the rate of the customer's use on _____.
- (d) Each non-residential water customer shall provide access to County or District personnel for purposes of meter reading and monitoring of compliance with this ordinance. All reasonable efforts will be made to contact customers to arrange for access.
- (e) (1) If the mandated further reduction in water usage cannot be obtained without imposing an extraordinary hardship which threatens health and safety, the non-residential customer may apply to the District for a variance. For these purposes "extraordinary hardship" means a permanent damage to property or economic loss which is substantially more severe than the sacrifices borne by other water users subject to this water rationing ordinance. If the further reduction would cause an extraordinary hardship or threaten health or safety, a variance may be granted and a revised water use reduction requirement for the particular customer may be established.
- (2) Any person aggrieved by a decision relating to such a variance rendered by a public utility or municipal corporation rendering water service beyond its corporate limits may file a complaint with the state's Public Service Commission.
- (f) The District will provide each non-residential customer with suggested means to reduce usage levels.

Section 7. Water Use Rationing for Hospitals and Health Care Facilities

- (a) Hospitals and health care facilities shall comply with all restrictions imposed on residential and non-residential water customers as may be applicable to each individual institution, to the extent compliance will not endanger the health of the patients or residents of the institution.
- (b) Each hospital or health care facility shall survey its water usage patterns and requirements and implement such additional conservation measures as may be possible without endangering the health of its patients or residents to achieve a further reduction in the institution's water usage.
- (c) The District will provide each hospital and health care facility with suggested means to reduce water usage levels.

Section 8. Enforcement of Water Rationing.

- (a) The water utility will have primary responsibility for monitoring of compliance with the water rationing ordinance.

 - (1) In order to effectuate compliance with its ordinance, the District is hereby authorized and required to plan and implement service interruptions to all or part of its water supply system, as may be deemed appropriate, when any and/or or all of the following conditions are determined to exist:
 - (i) The mandated reduction in system-wide usage has not been achieved, and/or
 - (ii) The mandated reduction in system-wide water usage has been achieved, but has failed to have a significant impact in extending limited water supplies, and/or,
 - (iii) Service interruptions are necessary in order to further extend limited and/or dwindling water supplies.
 - (2) In the event it is determined that service interruptions are necessary, the District shall notify its customers that a planned service interruption is to be imposed. This shall be done through the public media (newspapers, radio, and television) and at least one day prior to the service interruptions.

Such notice shall:

- (i) State the day or days when the planned service disruptions will occur;
- (ii) State the time(s) when such planned services interruptions will commence, and the time(s) such interruptions will cease;

- (iii) State whether the planned service interruptions are to be imposed on the entire systems, or part thereof, and, if only part(s) of the system will experience planned service interruptions, identify geographic boundaries within which such interruptions will occur; and
 - (iv) Advise all customers within the areas affected by planned services interruptions how to treat any water received from the system, for human consumption, during the period(s) of such interruptions and for such additional time as may be necessary until full pressure is restored to the system.
- (3) If a planned service interruption is imposed as authorized and required by this ordinance, it must provide for the continued delivery of water to health care facilities within the area(s) affected by such interruptions, by means of any adequate, alternative delivery measures that may be necessary.
 - (4) If a planned interruption is implemented, it must make provision, by any means possible, for the continued delivery of such water as may be necessary for the proper operation of sewage collection, treatment, and disposal systems and facilities.
 - (c) Any residential or non-residential water customer who exceeds the allotments established pursuant to this water rationing will be subject to the following excess-use charges.
 - (1) "Excess-use charges" will be collected based on the amount by which a customer's use exceeds the water allotments established pursuant to the local water rationing declaration, computed in accordance with the following schedule:

Excess Usage Per Month	Charge For Excess	
First 2,000 gallons or portion thereof	\$7.00	JUL 24 1999
